Docket No. :

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

- 1-18. (Canceled)
- 19. (currently amended) A system for application sharing in collaborative setting comprising:

a web zone for allowing a plurality of client computers to access the system via a global-area network, the web zone having at least one web server, wherein each of the plurality of client computers are enabled to access the web zone via a web browser;

a meeting zone for supporting an on-line conference among the plurality of client computers, the meeting zone having a meeting manager, a plurality of collaboration servers, and a plurality of application servers, wherein:

the meeting manager is operable to manage the on-line conference in the meeting zone;

each collaboration server is operable to host at least a portion of the online conference; and

each application server is operable to support at least one service for the on-line conference;

wherein the meeting zone allows an application program executing on one of the client computers in the on-line conference to be shared with [at least a portion] one or more of the other client computers in the on-line conference via the web browser of each of the one or more of the other client computers.

- 20. (previously presented) The system of claim 19 wherein each collaboration server and each application server comprises a respective logical server.
- 21. (previously presented) The system of claim 20 wherein the meeting zone comprises a process manager for monitoring each logical server.
- 22. (previously presented) The system of claim 20 wherein the meeting zone comprises a zone manager for supporting communication among the logical servers.
- 23. (previously presented) The system of claim 19 wherein the meeting manager is operable to maintain status information for them meeting zone.

Applicant Appl. No. Min Zhu, et al. 09/751,806 Paul H. Kang 16440.4006

Examiner Docket No.

- (previously presented) The system of claim 19 wherein the at least one service 24. for the on-line conference comprises one of document viewing, file sharing, video, voice over IP, telephony, polling, chat, and application sharing.
- (previously presented) The system of claim 19 wherein the meeting manager is 25. operable to manage all of the collaboration servers and the application servers in the meeting zone.
- (previously presented) The system of claim 19 wherein the meeting manager is 26. operable to determine whether a predetermined number of authorized conference participants has been exceeded.
- (previously presented) The system of claim 19 wherein the meeting zone allows 27. an application program executing on one of the client computers in the on-line conference to be viewed on at least a portion of the other client computers in the on-line conference.
- 28. (currently amended) A method for application sharing in a collaborative setting supported by a system having a web zone and a meeting zone, wherein the meeting zone has a meeting manager, a plurality of collaboration servers, and a plurality of application servers, the method comprising:

at the web zone allowing a plurality of client computers to access the system via a global-area network, wherein each of the plurality of client computers are enabled to access the web zone via a web browser;

at the meeting zone supporting an on-line conference among the plurality for client computers; and

at the meeting zone allowing an application program executing on one of the client computers in the on-line conference to be shared with [at least a portion] one or more of the other client computers in the on-line conference via the web browser of each of the one or more of the other client computers.

- 29. (previously presented) The method of claim 28 wherein supporting the on-line conference comprises hosting the on-line conference in the meeting zone.
- (previously presented) The method of claim 28 wherein supporting the on-line 30. conference comprises managing the on-line conference in the meeting zone.
